Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

ARIA

▲	Elements with an ARIA [role] that require children to contain a specific [role] are missing some or all of those required children.	▼
▲	Elements use prohibited ARIA attributes	▼

These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

CONTRAST

<div><div>▲</div><div>Background and foreground colors do not have a sufficient contrast ratio.</div><div>▼</div></div>

These are opportunities to improve the legibility of your content.

NAMES AND LABELS

<div><div>▲</div><div>Select elements do not have associated label elements.</div><div>▼</div></div>

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)	Show
-----------------------------------------	------

These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).
