# Accessibility

These checks highlight opportunities to <u>improve the accessibility of your web app</u>. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so <u>manual testing</u> is also encouraged.

#### ARIA

Elements with an ARIA [role] that require children to contain a specific [role] are missing some or all of those required children.

Elements use prohibited ARIA attributes

These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

### CONTRAST

▲ Background and foreground colors do not have a sufficient contrast ratio. 

✓

These are opportunities to improve the legibility of your content.
